1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Davidsson et al (6,247,160).

As per claims 1-11, Davidsson et al disclose the invention substantially as claimed, comprising:

A plurality of first elements each of which diagnoses itself (See, col. 12, lines 9-12); and

A second element which inputs diagnosis results from the first elements and determines whether or not there is a faulty first element is the first elements. (See, col. 12, lines 45-49).

As per claims 12-18, these method claims are also rejected under the same rationale as set forth the system claims.
